# **ABFE/FWM** Advisory Base Flood Elevations /FEMA Working Maps

### August 21, 2013

#### Advisory Base Flood Elevation (ABFE) / FEMA Working Maps (FWM):

This page is included for informational purposes only. It has no effect on whether a property currently requires flood insurance or what the insurance rate would be. The advisory map below is the most recent revision released by FEMA as of the date shown above.

ABFE and FWM are based on recent major storm events. In most cases, they reflect a higher coastal flood elevation than the current regulatory FIRMs (Flood Insurance Rate Maps). The current regulatory FIRMs are still the official source for determining Flood Insurance Requirements and Premiums. The new ABFE/FWM will aid local officials, builders, architects, insurance professionals, and property owners in making informed decisions about rebuilding.

\*\* Property owners should check with their local building officials to fully understand any requirements for using ABFE/FWM for rebuilding efforts.

27 Lincoln Ave, Rumson, NJ 07760-2050 Block: 141 Lot: 3

**n n** = ABFE or FWM base flood elevation in feet above sea level. Only applies to AE and VE zones. AO zones have base elevations of 3' or less. X and XO.2% zones are low risk zones with no elevations.

### FEMA SFHAs (Special Flood Hazard Area designated zones)

Zone A - No Base Flood Elevations determined.

Zone AE - Base Flood Elevations determined.

Zone AH - Flood depths of 1 to 3 feet (usually areas of ponding); Base Flood Elevations determined.

Zone AO - Flood Depths of 1 to 3 feet (usually sheet flow on sloping terrain); average depths determined. For areas of alluvial fan flooding, velocities also determined.

Zone VE - Coastal flood zone with velocity hazard (wave action); Base Flood Elevations determined.

## **Other Zones not designated SFHA (Special Flood Hazard Area)**

D - Areas in which flood hazards are undetermined, but possible.

X - Areas determined to be outside the 0.2% annual chance floodplain.

X (0.2 percent annual chance) - Areas of 0.2% annual chance flood; areas of 1% annual chance flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 1% annual chance flood.
